

SOURABH MAHAJAN

Senior Frontend Engineer — React · Next.js · TypeScript · Node.js

9175145920 | sourabhmahajan1992@gmail.com | [LinkedIn](#) | sourabhmahajan.in

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 9+ years architecting and shipping scalable React and Next.js web applications in Agile product teams, with full-stack depth in Node.js, GraphQL, and REST services. Also experienced with cross-platform mobile apps (Ionic/Cordova) and Salesforce platform integrations. Currently leading a team of 4 engineers as a Senior Software Engineer.

CORE SKILLS

Frontend: JavaScript, TypeScript, ReactJS, Next.js, Angular 2+, HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, GraphQL, REST APIs, Express.js

Databases: MongoDB, MySQL, Google Firebase

DevOps & Tools: Docker, Git, SVN, Bitbucket, Jenkins, SonarQube, Artifactory, Shell Scripting

Mobile: Ionic 3/4/5, Cordova, React Native, Android Studio, Xcode

Certification: Salesforce Certified JavaScript Developer

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Gyanmatrix Technologies

Nov 2022 – Present

- Litewave AI (litewave.ai), AI platform for quality and manufacturing teams in regulated industries: built the React frontend as part of a development team.
- DS Smith (dssmith.com), international packaging company: sole frontend engineer on a React project, owning frontend development and delivery end to end.
- Architect and direct a team of 4 engineers building scalable full-stack web applications with ReactJS, Angular, and Node.js in an Agile/Scrum environment.
- Engineer reusable, shared UI component libraries adopted across multiple product lines, reducing duplicate front-end development effort.

Senior Associate – Technology (L1) — Publicis Sapient

Mar 2022 – Nov 2022

- Built EventBay (XT Bay), an internal event-organizing and management platform with configurable approval workflows for workshops, tech talks, and seminars.
- Built REST APIs and server-side email scripting; implemented Redux for state management and Docker for deployment.

Software Engineer — Winspire Solutions Pvt Ltd

Jul 2020 – Feb 2022

- Served as Team Lead from Jan 2021 – Feb 2022, leading a team of 4 developers building hybrid-mobile and web applications using Ionic, Angular, and Node.js.
- Implemented server-side scripting, REST APIs, and Redux-based state management for production applications.
- Delivered projects recognized with internal “Star Performer” and “Overflow Contributor” awards.

Associate System Engineer — Tata Consultancy Services

Jan 2017 – Jun 2020

- Designed and deployed GeoMap, an offline-first mobile app for LafargeHolcim (TCS Mobility team), enabling field data capture with GPS tagging and offline sync for users across the African continent, using Ionic 3, Angular 6+, and Firebase.
- Built server-side push-notification scripting and managed cross-platform releases to the App Store and Google Play.
- Recognized with client “On-Time Delivery” and “Customer Satisfaction” awards at the BU level.

SELECTED PROJECTS

PaceFuse (pacefuse.com) — Personal project: platform for runners, running clubs, and running events.

- Created PaceFuse, a platform where runners discover and join running clubs, find running events, and connect with other runners, with a mobile-friendly interface.
- Built solo using AI-assisted development, owning product scope, UX, and iteration from idea to live site.

TargetX (Gyanmatrix client) — Higher-education recruitment, admissions, and retention platform built on the Salesforce platform.

- Designed, developed, and deployed multiple product modules covering the student lifecycle from admission through retention.

- Built and maintained reusable component libraries across ReactJS, AngularJS, and Angular 4+ codebases.

EKAL — Mobile and web services marketplace (personal care, household, housekeeping) for the Saudi Arabia market, comparable in scope to UrbanCompany.

- Built order, inventory, and QR-based payment workflows integrated with a PayPal checkout flow, using Ionic 4, Angular 8+, and Microsoft Dynamics Business Central.

AWARDS & EXTRACURRICULAR

- Integrated a Jenkins DevOps pipeline for Android mobile app releases.
- Built “Probat” (native Android), an internal innovation project.
- Client-recognized “On-Time Delivery” award — BU level.
- Client-recognized “Customer Satisfaction” award — BU level.
- Star Performer award — TargetX.
- Overflow Contributor award — TargetX.
- Marathon runner; Ironman finisher.

EDUCATION

Master of Computer Applications (MCA) — 2016 — 75%

Bachelor of Computer Applications (BCA) — 2013 — 66%
